

WPC Presents:

The Science of Seasonal Weight Restrictions

Thursday, January 25, 2024
10:00 - 11:00 AM (CST)

with Tim Colling, Ph.D., P.E.

Roads make up the lifeblood of the US economy. Each day billions of dollars of worth of freight travels over US roads along with millions of people getting to their places of employment. However, each spring seasonal weight restrictions reduce the legal load limit for several months in the northern part of the country. This webinar will discuss the mechanisms that cause damage to roads during spring thaw and relate that damage to the necessity of seasonal weight restrictions.
